

Project Design Phase-II

Data Flow Diagram

PROJECT TOPIC:FERTILIZERS RECOMMENDATION SYSTEM FOR DISEASE PREDICTION

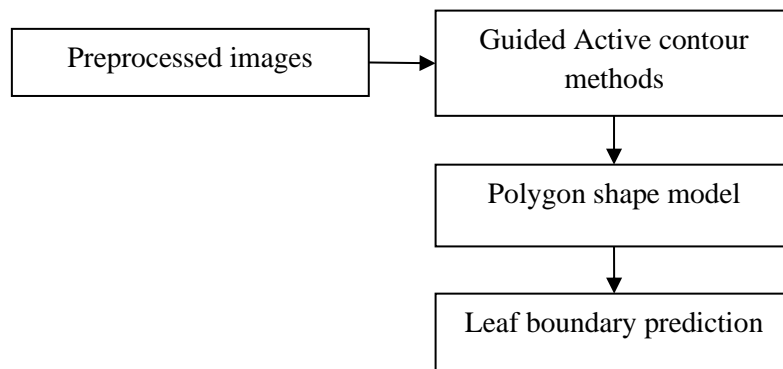

TEAM ID: PNT2022TMID08365

NAME:sathyan S(team head)

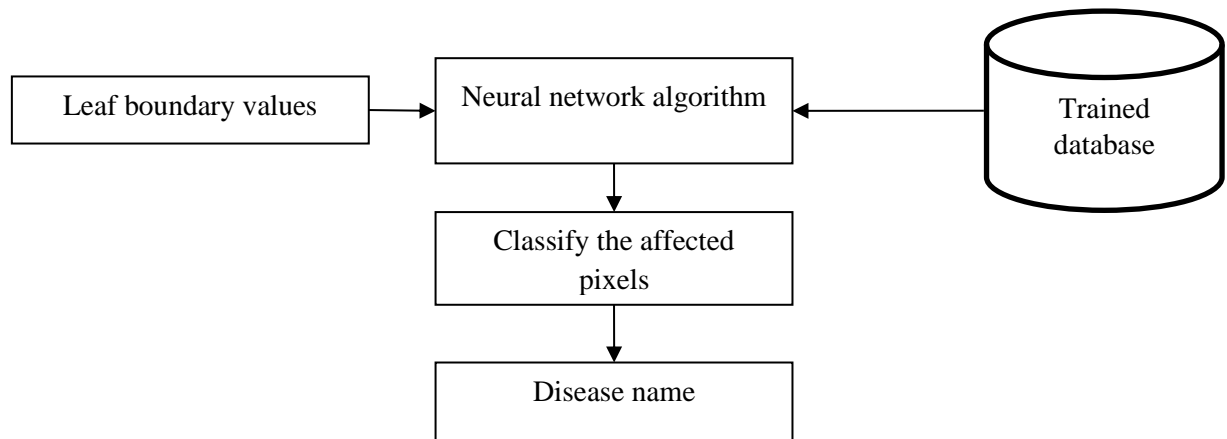

Data Flow Diagrams:

The classic visual representation of how information moves through a system is a data flow diagram (DFD). A tidy and understandable DFD can graphically represent the appropriate quantity of the system demand. It can be done manually, automatically, or both. It demonstrates how information enters and exits the system, what modifies the data, and where information is kept. A DFD's goal is to outline the boundaries and scope of a system as a whole. It can be utilised as a communication tool between a system analyst and any participant in the sequence that serves as the foundation for system redesign.
